

Price Management Rel 8.12

Duration: 3 Days

What you will learn

This course provides hands-on instruction on the Advanced Price Management System. Students will learn how to define price groups, set up price adjustments, create adjustment schedules, tie adjustments to customers, and set up the adjustment details, which includes free goods, rebates, baskets, and accruals. The students will also learn how to maintain, view, and print prices for customers. A hands-on case study will also be available to tie the entire process together. Upon completion of this course, students will be able to confidently set up and revise prices for items, item groups, customers, and customer groups.

Audience

Functional Implementer

Prerequisites

Required Prerequisites
