

Unlimited Possibilities for Limited Budgets

The Issue

Industrial Manufacturers and Distributors face challenges such as growing service level expectations, manufacturing efficiencies, and on time delivery. They may have multi-mode manufacturing environments in multiple locations and countries. Closer collaboration with customers and suppliers is becoming essential.

Oracle Accelerate Validated Provider of Industrial Manufacturing, Products & Components

Syntax.net Is the Right Partner for Your Products & Components Solution

The Industrial Manufacturing Business Accelerator allows small and medium sized manufacturers to transform their businesses with pre-built core functionality that is easy to implement but very flexible to allow for growth and change.

The Products & Components Accelerate solution will provide the following key functionality:

- **Easy to Use** – The Products & Components Accelerate solution is tailored for the Products & Components industry to enable unique business processes with industry-relevant data across Oracle's JD Edwards EnterpriseOne modules. The Products & Components solution will set up and retrofit the system based on entries specified within the setup questionnaire or template. Additionally, customers can add, modify, and expand the entire footprint as their business scales, yet achieve very fast results by selecting the industry-specific business transactions they need.
- **Industry Complete** – The Products & Components Accelerate solution includes industry best practices and supporting business flows for Products & Components. These are models of business transactions representing leading business practices. Business flows enable the customer to relate their business requirements to the Oracle JD Edwards EnterpriseOne solution functionality. Key business processes enabled include:
 - Prepare Detailed Forecast
 - Master Schedule & Plant Material Requirements (MRP)

- Discrete/Process Manufacturing
- **Easy to Implement** – The Products & Components Accelerate solution deploys common business transactions in JD Edwards EnterpriseOne, dramatically speeding up the initial stages of an implementation. Implementers can enable customers to begin testing personalized business transactions within hours. This allows implementers to spend more time on additional value-added activities, and ultimately increases the return on investment for the customer.
- Implementation plan and scripts can be used to accelerate the deployment of the customer solution.
- Validation plan and scripts can be used to further validate and certify the customer solution.
- Education and knowledge transfer provides the utilities to test, train, and educate individual business users.

Why do SMB companies choose Oracle?

- Industry-focused solutions to meet your unique requirements
- Complete solutions to meet your needs today and tomorrow
- Easy-to-own solutions with predictable value

Syntax.net and Oracle

Doing more with less and quickly adapting to changing business demands are not just goals; they are organizational imperatives. Every step made toward increased business efficiency and agility in the marketplace must have a direct impact on the bottom line and provide a solid return on investment.

Syntax.net and Oracle are aligned to help businesses address these challenges. Together, we have the products, services, and experience to deliver enterprise wide information and IT adaptability, and the track record to prove it.

Unlimited Possibilities for Limited Budgets

Long recognized as a leading technology innovator—Oracle provides an integrated suite of applications that can provide companies with immediate access to complete, high quality business information.

With a rich understanding of Oracle technology and a results-oriented approach to mission-critical business systems and consulting services, Syntax.net successfully implements Oracle applications to help you:

- Gain strategic advantage and make informed business decisions with immediate access to accurate information in a single database
- Boost productivity, cut costs, and increase revenues through operational efficiency, process automation, and enterprise integration
- Reduce risk and quickly transform your business for increased time-to-benefit

As an Oracle Accelerate partner, Syntax.net can ensure that our consultants remain at the forefront of Oracle technology and that our clients receive the highest level of technical expertise and professional consulting services available.

Syntax has been implementing Oracle JD Edwards solutions since 1997. A multiple winner of the Canadian JD Edwards Partner of the Year Award, Syntax has implemented over 60 JD Edwards accounts and provides implementation and support services to more than 100 customers.

**Oracle Accelerate—Unlimited Possibilities
for Limited Budgets**

Oracle and its partners recognize that small and
medium businesses demand comprehensive business
solutions that are low-cost, low-risk, and provide
industry-specific functionality and faster time-to-value.

Oracle Accelerate delivers a complete set of
applications, rapid implementation tools, and an
extensive partner system, so small and medium
businesses can maximize their budgets and achieve
real business value quickly. Utilizing a fixed-scope
approach, Oracle Accelerate substantially reduces
the complexity of more traditional, large-scale
implementations.

For customers interested in a rapid, low-risk approach,
Oracle Accelerate provides the opportunity to leverage
world-class functionality
at unprecedented entry-level value.
