

***Times are changing. Small and Medium Enterprises (SME's), need to evolve or risk being left behind.***

Outdated IT systems, inadequate reporting and ineffective accounting systems will not help you flourish in today's competitive business world. In fact, they can cost your organization money and lost productivity every single day. Now there's an affordable ERP solution designed for companies like yours: **SAP Business One**.

***SAP Business One***

SAP Business One is an intuitive, easy-to-use ERP Solution that can help your emerging business dramatically streamline its operational and managerial processes. It's a tried and tested solution that will allow you to gain better control of your ever-changing business.

SAP Business One is designed with the needs of the small to medium enterprise in mind, ensuring a rapid, affordable implementation. It's a comprehensive software solution that will automate your vital business processes -- all the way from order management and accounting, right through to sales force automation and production.

You'll quickly benefit from SAP Business One's award-winning "Drag & Relate" data navigation system, along with its imbedded contact management functionality and integrated sales force automation. Other functions include comprehensive financial management, a complete inventory management system, and an extensive reporting module that allows you easy access to all of your valuable data including role based KPI.

SAP Business One will show you immediate benefits. You'll see operating efficiency increase and have the data you need to make better, real-time business decisions. And, best of all, it's a solution designed and priced well within the reach of many SME's who may have thought they could not afford a fully-functionally ERP system from SAP.

***Your business is unique...Your solution provider should be too.***

For over 35 years, Syntax.net has become a leading provider of business software solutions to emerging and mature Canadian companies. Syntax.net is unique... we harness the power of our business technology and consulting experience to transform organizations into highly efficient, integrated, customer-focused businesses.

Unlike conventional systems integrators and providers of technology applications for business, Syntax.net has developed implementation methodologies crafted to address the unique needs and limited resources of small and medium enterprises. From manufacturing and distribution to retail and service, our dedicated team of professionals brings with it a varied and extensive background of experience from a broad range of industries. It is your assurance that both our people and our solutions are ideally suited to fulfill your specific objectives.

***Identifying customer needs is one thing. Meeting them as promised is quite another.***

Today's competitive environment requires a detailed understanding of your business as a starting point but understanding alone is insufficient to affect a solution. For that you need a team with the experience to translate your requirements into an efficient SAP Business One solution. You need a team that understands your hardware infrastructure, your SAP Business One vision, current and planned, and your project – how to manage it with your resource commitments. You need a team with a proven track record. You need Syntax.net

***Syntax: Defining Solutions and Delivering the Technology that Drives Them.***

Syntax.net offers a comprehensive suite of Consulting Services designed to ensure the successful implementation and operation of your SAP Business One solution:

- Project Management
- Programming
- Installation
- Training
- Migration Assistance
- Conversion & Configuration
- 'Go Live' Assistance
- Post Installation Audits
- Architecture Design & Implementation
